Safibra, s.r.o.

Černokostelecká 1621, 251 01 Říčany
Czech Republic
tel.: +420 323 601 615, +420 323 606 007
fax: +420 323 601 615, +420 323 606 007
e-mail: safibra@safibra.cz
www.safibra.cz
Company Registration No. 25787012
Tax Identification No. CZ25787012

Registered number of employees:	6
Revenues (millions of CZK):	15,5
Registered capital of the company (millions of CZK):	0,2
The proportion of exports in total revenues (in %):	16

Authorized representative of the company:

Ing. Ladislav Šásek, CSc.
Director, Authorized representative
e-mail: ladislav.sasek@safibra.cz

Business agent of the company:

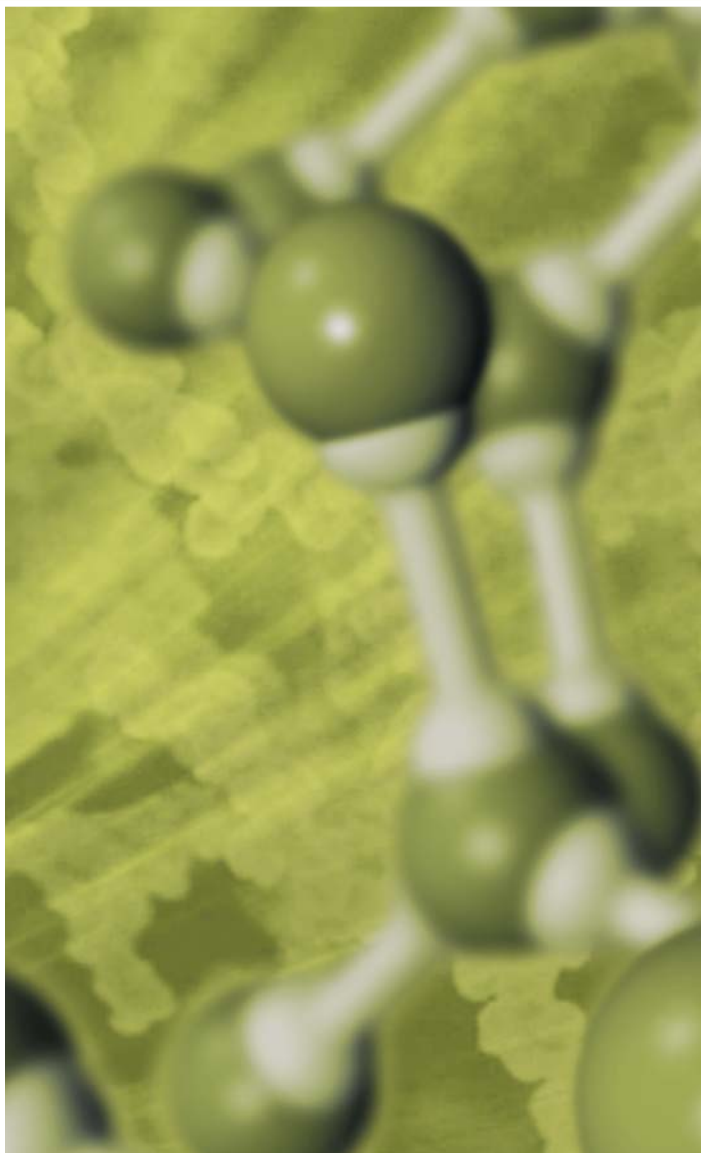

Ing. Michal Mazanec
Commercial director
e-mail: michal.mazanec@safibra.cz

Regular participation in trade

fairs and exhibitions: AMPER 2008
Major markets abroad: Czech Republic
Slovak Republic
Poland, Croatia

The production programme:

- Broadband optical sources
- FBG gratings
- Individual optical systems
- Design software
- Optical microphones
- Optical fibres & optical fibre sensors
- Optical fibre amplifiers
- Spectrometers and accessories
- Optical fibre lasers
- Educational & training kits
- Security technology

THIS PROJECT IS CO-FUNDED BY THE EUROPEAN REGIONAL DEVELOPMENT FUND AND BY THE MINISTRY OF INDUSTRY AND TRADE OF THE CZECH REPUBLIC.

Member of the Medicine-Pharmaceutical Cluster NANOMEDIC

The **Safibra, s.r.o.**, company was established in 1999, as a subsidiary company of Mikrokom, Ltd company with one objective – to provide the customers in the Central European Region with products and services in the field of optical fibre applications. The founders of the company had more than twenty years of experience in the field of fibre optics, especially in the area of methodology of optical fibre characterization and their testing. It helped the firm to widen its activities and start to meet the above mentioned goals based on a skilled and professional attitude towards the demands of the customers and the partners. The Safibra, s.r.o. company is a private organization focused on top-quality optical fibre technologies and products, especially optical fibre sensors and systems. Safibra provides its customers with full support in project planning and design of optical systems and sensor systems for specific applications, installation and system set-up, solutions to specific demands and thanks to the gained experience and knowledge in the field of optical fibre technology it also provides consultation and training activities.

In the region of the Czech Republic, Slovakia and other Central European countries, Safibra represents several companies operating in the field of optical fibre technology, distributes their products and provides the guarantee and postguarantee services. Its development team designs and manufactures individual optoelectronic sensors and systems for research and university centres, laboratories and for industrial use. The Safibra company is in contact with numerous scientific workplaces, universities and research institutes in the Czech Republic as well as worldwide that deal with the issues of optical fibre sensors and whose valuable information Safibra uses for its work. Based on the listed facts, we believe that Sabifra meets all the prerequisites to integrate among in the long term stable, specialized workplaces of top quality, whose services are used with pleasure and repeatedly by customers.

Development and manufacturing of photoelectronic sensors utilizable in development and production of on-line monitoring of the production processes and sensors suitable for the monitoring of various physiological and pathological processes within the organism, such as wound healing, targeted distribution of biologically active substances, etc., is the main task of Safibra in the framework of the cluster. It also provides the development, construction and manufacturing of special devices for the manufacturing of these sensors.
