**BATIST** is currently a major producer of sterile gauze products and bandage kits and tools for individual medical interventions and treatment in patients.

Another group consists of products made of cellulose cotton particularly tampons and cut pieces in various size modifications. **BATIST** is also successful in the sales of knitted and elastic roller bandages, different kinds of plasters, incontinence aids, and other medical devices. Detailed specification and descriptions are provided on [www.batist.cz](http://www.batist.cz).

**BATIST** supplies its products to the majority of major healthcare facilities, faculty and regional hospitals throughout the Czech Republic. It also delivers its products successfully to many countries of Europe and the Middle East.

## Member of the Medicine-Pharmaceutical Cluster NANOMEDIC

### Profile of BATIST s.r.o.:

BATIST s.r.o. is a constituent member of the cluster Nanomedic s.r.o. The main programme of BATIST s.r.o. is the production and distribution of bandage materials and wound dressing products. Production experience, technological facilities and knowledge of requirements of the healthcare market are the main reasons for membership in the Cluster Nanomedic a.s. with the possibility of ensuring the production of components or products developed by the cluster Nanomedic a.s. in the area of wound healing.

BATIST was founded in 1992 and specialized in the production of gauze bandages. Over the following years, the production programme was enriched with fixation and elastic bandages, cotton hygienic products and other groups of products of medical material/devices. The company invested in its development and in 1998 opened the upgraded facility and distribution centre in Červený Kostelec in eastern Bohemia. The facility also includes clean premises for the production of sterile medical products.

Since 2003 the quality assurance system according to EN ISO 13485:2003 has been implemented in all activities of the company, which is inspected every year by the renowned certification company the TÜV Rheinland Group. BATIST products are verified by the quality mark CE, which is also granted by the TÜV Rheinland Group.

As BATIST is one of major producers of medical and hygienic products in the Czech Republic, which specializes in the production of bandages, the role of the company in the cluster is to introduce the results of research and development in the area of wound healing in production.
